

PicoPV Kit

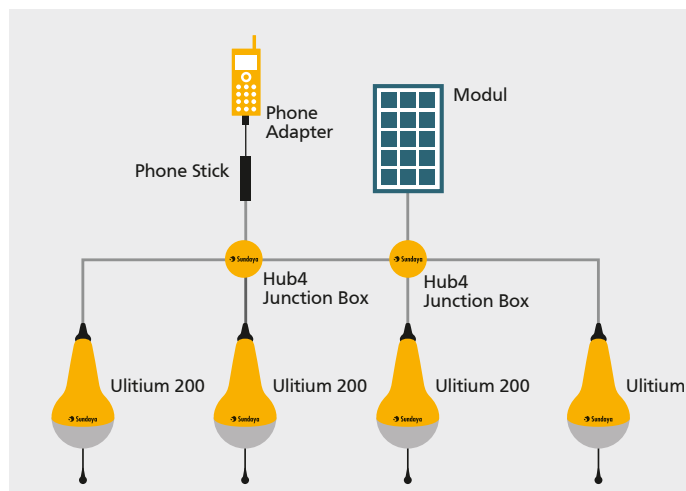

4 Ulitium 200 Lightkit

303208 • 12/2014

Sundaya presents a Pico PV- product range for the illumination and charging of small electronic loads. Three highly efficient LED-lamps with an integrated Li-Ion-accumulator are in the focus. Ulitium, T-Lite and JouLite are appropriate for various illumination purposes and vary in size and design.

The kits can be optionally extended with further Sundaya components to comply with the individual customers' every wish.

The Sundaya Ulitium Lightkits have revolutionised the solar market. The Pico PV-systems are the most cost-effective and maintenance free alternative to Standard-Solar-Home-Systems. The popular Sundaya Ulitium lamps provide a luminous power of 240 Lumen. The kit is easy to install and can be extended without any problems. You will get everything you need for illumination in one box!

Technical data	
4 Ulitium 200 Lightkit white	Art.No. 303208
4 Ulitium 200 white 4x 240 lm Module 12 W/12 VDC 510 x 125 x 293 mm 4,7 kg	
Phone Stick	Art.No. 390745
Input voltage 16,5 – 20 VDC nominal output voltage 5 VDC 500 mA IP22 70 x Ø 22 mm 26 g
