FOR YOUR RECORDS

Write the model and serial numbers here:

Model #
Serial #

You can find them on a label on the side of each unit.

Installer’s Name
Purchased Date

Staple your receipt to this page in the event you need it to prove date of purchase or for warranty issues.

READ THIS MANUAL

Inside you will find many helpful hints on how to use and maintain your AWHP properly. Just a little preventive care on your part can save you a great deal of time and money over the life of your product.

You’ll find many answers to common problems in the chart of troubleshooting tips. If you review our chart of Troubleshooting Tips first, you may not need to call for service at all.

PRECAUTION

• Contact the authorized service technician for repair or maintenance of this unit.
• Contact the installer for installation of this unit.
• AWHP is not intended for use by young children or invalids without supervision.
• Young children should be supervised to ensure that they do not play with AWHP.
• When the power cable is to be replaced, replacement work shall be performed by authorized personnel only using only genuine replacement parts.
• Installation work must be performed in accordance with the National Electric Code by qualified and authorized personnel only.
Safety Precautions

To prevent injury to the user or other people and property damage, the following instructions must be followed.

Incorrect operation due to ignoring instruction will cause harm or damage. The seriousness is classified by the following indications.

⚠️ WARNING
This symbol indicates the possibility of death or serious injury.

⚠️ CAUTION
This symbol indicates the possibility of injury or damage.

⚠️ WARNING
Always ground the product.
- There is a risk of electric shock.

Do not use a defective or underrated circuit breaker. Use the correctly rated breaker and fuse.
- There is risk of fire or electric shock.

Do not use a multi outlet. Always use this appliance on a dedicated circuit and breaker.
- There is risk of fire or electric shock.

For electrical work, contact the dealer, seller, a qualified electrician, or an Authorized Service Center. Do not disassemble or repair the product by yourself.
- There is risk of fire or electric shock.

Always ground the product as per the wiring diagram. Do not connect the ground wire to gas or water pipes lightning rod or telephone ground wire.
- There is risk of fire or electric shock.

Install the panel and the cover of control box securely.
- There is risk of fire or electric shock due to dust, water etc.

Use the correctly rated breaker or fuse.
- There is risk of fire or electric shock.

Do not modify or extend the power cable. If the power cable or cord has scratches or skin peeled off or deteriorated then it must be replaced.
- There is risk of fire or electric shock.

For installation, removal or reinstall, always contact the dealer or an Authorized Service Center.
- There is risk of fire, electric shock, explosion, or injury.

Do not install the product on a defective installation stand. Be sure that the installation area does not deteriorate with age.
- It may cause product to fall.

Never install the unit on a moving base or a place from where it can fall down.
- The falling unit can cause damage or injury or even death of a person.

When the product is soaked (flooded or submerged) in water, contact an Authorized Service Center for repair before using it again.
- There is risk of fire or electric shock.

Be sure to check the refrigerant to be used. Please read the label on the product.
- Incorrect refrigerant can prevent the normal operation of the unit.

Don’t use a power cord, a plug or a loose socket which is damaged.
- Otherwise it may cause a fire or electrical shock.

Do not touch, operate, or repair the product with wet hands.
- There is risk of electric shock or fire.

Monitoring Information

Electric heater STEP one
Electric heater STEP two
These icons indicate that the backup electric heater is operating.

Sanitary water tank heater
This icon indicates that sanitary water tank electric heater which is located inside sanitary water tank is active.
The icon is not used when sanitary water tank is not installed.

Water pump
This icon indicates that the water pump inside the unit is active.

Auxiliary solar thermal pump
This icon indicates that auxiliary solar thermal pump is active.
NOTE: As installation of auxiliary solar thermal pump is not compulsory but recommendation according to field condition, this icon can be seen although no auxiliary solar thermal pump is installed.

Defrosting
This icon indicates that the defrost mode is active.
This mode is automatically operating.

Maintain lowest temperature
The purpose of this mode is maintaining the temperature to prevent damage by freezing of water pipe.

Disinfection
This icon indicates disinfecting operation is ongoing in sanitary water tank.

Compressor
This icon indicates that the compressor is active.

Child Lock
No function

Central Controller
This icon indicates that the product is controlled by the central controller.

Thermostat
This icon indicates connection with thermostat.

Slight trouble
This icon indicates that slight trouble is occurred.

Heavy trouble
This icon indicates that heavy trouble is occurred.
**Mode Change**

Turn on the product and select operation mode.

1. Press power button to turn on the product.

2. Press OPER MODE button to select each operation mode.

   - **Cooling operation**
   - **Heating operation**
   - **Weather dependent operation**

**Operation mode**
- Cooling operation - The product yields cool water to use in FCU cooling.
- Heating operation - The product yields hot water to use in under floor heating or FCU heating.
- Weather dependent heating operation - In this mode, heating setpoint is automatically determined by pre-defined temperature profile.

**Selecting Target Temperature**

1. Press SET TEMP button to select each operation mode.

   - **Room temperature**
   - **Leaving water temperature**
   - **Sanitary water tank temperature**

2. Adjust desired temperature by pressing change TEMP buttons on each mode.

   - To raise the temperature
   - To lower the temperature

**Note**
- Increase 1 ℃ or 2 ℉ per one time pressing
- Decrease 1 ℃ or 2 ℉ per one time pressing
- We can change the temperature range of each mode on installation setting mode. Please refer function code 11 to 15.
- Room temperature setting is available when remote room air sensor (sold separately) is installed. Please refer function code 03.
- Sanitary water tank temperature setting is available when sanitary water tank is installed.
Weather-Dependent Operation

This mode is only applied to heating. In order to save energy and to give highest comfort, setting temperature will follow outside temperature. If outdoor temperature decreases, heating capacity for the house will increase automatically in order to keep same room temperature. All parameters will be set by installer during start-up procedure and will be adapted to the site characteristic.

1 Press OPER MODE button to select weather-dependent operation mode.

2 Adjust the desired temperature level by pressing change TEMP buttons.

Ex) Decreasing temperature profile by 3°C (based on room air temperature)

<Temperature adjust step (unit : °C)>  
-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5

View Temperature

1 Press repeatedly VIEW TEMP button
To select each temperature. (Whenever press VIEW TEMP button, the room temperature will be displayed during 5 seconds.)

Sanitary Water Heating Operation

1 Press repeatedly view button

- <Sanitary water heating disable> → <Sanitary water heating enable>

2 Sanitary water heating operation is operating only on enable condition. During operation, segment will be on.

- <Sanitary water heating ON>

>Note>
- This function is not used when the sanitary water tank is not installed.
- If you want to know more information, refer function code [15, 26~29] on installation information section.
Silent Mode Operation

Silent mode operation is that the unit works at reduced capacity so that the noise produced by the unit drops.

1. Press the programming button repeatedly until silent mode icon is shown.

2. Press left, right button to select menu. “AM/PM or hour”

3. Press down button to move to AM/PM part and adjust it. (The AM/PM segment will be flashed).

4. Press right button to move to "Hour" part. (the "Hour" segment will be flashed).

5. Press up, down button to adjust the Hour.

6. If you finish the setting, press OK / CLEAR button.

7. Press exit button to exit or system will automatically release without any input 25 seconds.

⚠️ This implies that the heating and cooling capacity will also drop. Beware of this when a certain level of heating or cooling is required.

⚠️ Silent mode operation may not work while the product is proceeding higher priority operation such as defrost operation, anti-freezing operation, and etc. (When this mode is not operated by the priority order, ONLY display SILENT.)
Child Lock

This function is to prevent children or other people from using controller.

1. Press function setting button to enter user setting mode. (The segment will be flashed)

2. Press OK / CLEAR button to finish the selection. The segment will be disappear.

3. During Child Lock, icon and ‘CL’ will be displayed during 3 seconds whenever entering any kind of buttons except for view temperature button and setting/clear button.

4. To release this setting, pressing function setting button until icon flash and then enter OK / CLEAR button.
Quick Sanitary Tank Heating

If there is urgent sanitary heating demand, Quick Sanitary Tank Heating mode can be used to reduce the time to reach target sanitary tank temperature by forcibly turning on sanitary tank heater. After reaching target sanitary tank temperature or by user’s input to stop, Quick Sanitary Tank Heating mode will be finished.

1. Press Sanitary Tank Heating Enable button with up button for 3 seconds to start Quick Sanitary Tank Heating. ‘Sanitary Tank Heating Enable’ icon and ‘Sanitary tank heater’ icon will be flashing together.

2. If target sanitary tank temperature is reached or user pushes Sanitary Tank Heating Enable button with down button for 3 seconds, Quick Sanitary Tank Heating will be finished and icon flashing will be stopped.
Error Code display

The error code will be displayed on control panel.

Slight trouble : Sensor trouble

Heavy trouble : Compressor cycle trouble

Critical error

On critical error, the unit will stop unconditionally. At this time, 'CH' and error code No. keep display by turns.
You can set current time.

1. Keep pressing programming button for 3 seconds to enter Setting current time mode.

2. Press left, right button to adjust the current day.

3. Press down button to move to AM/PM part and adjust it. (The AM/PM segment will be flashed).

4. Press right button to move to "Hour" part. (the "Hour" segment will be flashed).

5. Press up, down button to adjust the Hour.

6. Press right button to move to "Minute" part. (the "Minute" segment will be flashed).

7. Press up, down button to adjust the Minute.

8. If you finish the setting, press OK / CLEAR button.

9. Press exit button to exit or system will automatically release without any input 25 seconds.
Programming : Setting Simple Reservation

You can easily turn-on reservation. (ONLY enable when unit is stand-by.)

1. Press programming button to enter the Programming mode. (the segment flashing)

2. Press up, down button to adjust the reservation time.

3. If you finish the setting, press OK / CLEAR button to complete programming.

4. Press exit button to exit or system will automatically release without any input after 25 seconds.

Programming : Setting Sleep Reservation

You can easily turn-off(sleep) reservation. (ONLY enable when unit is operating.)

1. Press programming button to enter the Programming mode. Repeat pressing button to select [sleep reservation]. (the segment flashing)

2. Press up, down button to adjust the reservation time.

3. If you finish the setting, press OK / CLEAR button to complete programming.

4. Press exit button to exit or system will automatically release without any input after 25 seconds.
After installing water pipes for under floor heating, user can select screed drying mode for curing the cement.

1. Keep pressing programming button for 3 seconds to enter setting screed drying mode.

2. Press programming button to select function code 18.

3. Press left, right button to move to screed drying setting part.

4. Press up, down button to adjust “01” or “00” (00: Not Used 01: Used)

5. If you finish the setting, press OK / CLEAR button.

6. Press exit button to exit or system will automatically release without any input 25 seconds.

7. During the screed drying mode, “dry” is displayed. Left days for completing the screed drying mode are displayed.
Programming : Setting ON Reservation

This function is able to turn-on after a setting time.

1. Press programming button to enter the Programming mode. Repeat pressing button to select [on reservation]. (the segment flashing)

2. Press up, down button to adjust AM/PM.

3. Press right button to move to "Hour" part. (the "Hour" segment will be flashed).

4. Press up, down button to adjust the Hour.

5. Press right button to move "Minute" part. (the "Minute" segment will be flashed).

6. Press up, down button to adjust the Minute.

7. If you finish the setting, press OK / CLEAR button to complete programming.

8. Press exit button to exit or system will automatically release without any input after 25 seconds.
This function is able to turn-off after a setting time.

1. Press programming button to enter the Programming mode. Repeat pressing button to select [off reservation]. (the segment flashing)

2. Press up, down button to adjust AM/PM.

3. Press right button to move to "Hour" part. (the "Hour" segment will be flashed).

4. Press up, down button to adjust the Hour.

5. Press right button to move "Minute" part. (the "Minute" segment will be flashed).

6. Press up, down button to adjust the Minute.

7. If you finish the setting, press OK / CLEAR button to complete programming.

8. Press exit button to exit or system will automatically release without any input after 25 seconds.
Programming: Weekly Reservation

The weekly reservation is active after setting current time.

1. Press programming button to enter the Programming mode. Repeat pressing button to select [Weekly reservation]. (the segment flashing)

2. Press left, right button to adjust the current day.

3. Press up, down button to adjust the action number.

4. Press right button to move to "Hour" part on ON time section. (The "Hour" segment will be flashed).

5. Press up, down button to adjust the Hour on Start Time section.

6. Press right button to move to "Minute" part on start time section. (The "Minute" segment will be flashed).

7. Press up, down button to adjust the minute on start time section.

8. Press right button to move to "Hour" part on OFF time section. (The "Hour" segment will be flashed).
9 Please refer the process from No.5 to No.7 for setting OFF time. It is same method.

10 If you finish the setting, press setting/cancel button to complete programming. The under bar segment will be created, when it finished.

11 Please refer the process from No.2 to No.10 for setting other day weekly program. It is same method.

12 Press exit button to exit or system will automatically release without any input after 25 seconds.

<Note>
Description of weekly reservation

<Start time selection>

<Off time selection>

Action
Start Time

To
Off Time

※ Two actions per weekday can be programmed, in total 14 actions.
Programming : Holiday Reservation

This function is to automatically stop the machine working on some days.

1. Press programming button to enter the Programming mode. Repeat pressing button to select [Holiday reservation]. (the segment flashing)

2. Press left, right button to adjust the holiday.

3. When you press set/clear button after finishing the selection, the day selected will be disappear.

4. Press exit button to exit or system will automatically release without any input after 25 seconds.
Programming : Sanitary Tank Heating & Sanitary Tank Heater Operation

This function is schedule programming about sanitary tank heating and sanitary tank heater operation. Two schedule programming for sanitary tank heating and another Two schedule programming for sanitary tank heater operation are possible. Pre-assigned program numbers for sanitary tank heating programming are ‘1’ and ‘2’. Programming number ‘3’ and ‘4’ are assigned for sanitary tank heater operation. Scheduled programming will be operated everyday.

1. Press programming button to enter the programming mode. Repeat pressing button to select sanitary tank heating programming. (the segment flashing)

2. Press left and right button to adjust schedule program number. Programming number ‘1’ and ‘2’ are for sanitary tank heating programming (if selected, ‘Sanitary tank heating enabled’ icon will be flashing), and ‘3’ and ‘4’ are for sanitary tank heater operation programming (if selected, ‘Sanitary tank heater’ icon will be flashing).

3. After selecting programming number, press down button to enter adjusting turn-on time. Turn-on time can be adjusted by pressing left, right, up, and down button. After assigning minute of turn-on time, press right button to enter adjusting turn-off time. Like adjusting turn-on time, press left, right, up, and down button to change turn-off time.

4. Press set button to finish programming.
To exit Programming mode, press ESC button.
Using Thermostat

The term "thermostat", which is widely used in this chapter, is a kind of 3rd party accessory. LG Electronics does not supply thermostat and it should be supplied 3rd party manufacturers. Room thermostat can be used for easy and convenience control. To utilize thermostat more efficiently and correctly, this chapter presents information about using thermostat.

**CAUTION**

1. Some electro-mechanical type thermostat has internal delay time to protect compressor. In that case, mode change can takes time more than user's expectation. Please read thermostat manual carefully if the product does not response quickly.
2. Setting temperature range by thermostat can be different with that of the product. The heating or cooling set temperature should be chosen within the setting temperature range of the product.

How to use Thermostat

To find how to turn on and off, how to set target temperature, how to change operating mode, etc, please refer thermostat operating manual provided by thermostat manufacturer.

Operating Thermostat with Control Panel

**• Following features are permitted when thermostat is installed.**

- SET TEMP button
- VIEW TEMP button
- Temperature adjust button*
- Sanitary water heating Enable / Disable
- Silent operation On / Off

* : Adjusted temperature is only used to control electric heater on / off condition. The product does not turn on / off according to the setting temperature at the control panel. It turns on / off according to the thermostat signal.

**• Following features are NOT permitted when thermostat is installed.**

- Operating mode (cooling/ heating/ weather-dependent) selection
- Time scheduling
- Operation On / Off
Using Thermostat

Emergency Operation

• Definition of terms
  - Trouble: a problem which can stop system operation, and can be resumed temporarily under limited operation without certificated professional’s assist.
  - Error: problem which can stop system operation, and can be resumed ONLY after certificated professional’s check.
  - Emergency mode: temporary heating operation while system met trouble.

• Objective of introducing ‘Trouble’
  - Not like airconditioning product, Air-to-Water heat pump is generally operation in whole winter season without any system stopping.
  - If system found some problem, which is not critical to system operating for yielding heating energy, the system can temporarily continue in emergency mode operation with end user’s decision.

• Classified trouble
  - Trouble is classified two levels according to the seriousness of the problem.: Slight trouble and Heavy trouble
  - Slight trouble: Sensor trouble. In most case, this trouble is concerned with sensor problems. The unit is operating under emergency mode operation(level 1).
  - Heavy trouble: Compressor cycle trouble. Emergency mode operation(level 2) is performed by optional electric heater.
  - Option trouble: a problem is found for option operation such as water tank heating. In this trouble, the troubled option is assumed as if it is not installed at the system.

• Emergency operation level
  - When system met trouble, it stops operation and wait for user’s decision: Calling service center or starting emergency operation.
  - To start emergency operation, user simply push ON / OFF button once more.
  - Two different levels are prepared for emergency operation: High temperature cycle and low temperature cycle.
  - In emergency operation mode, user can not adjust target temperature.

※ It can not be operated, if the electric heater accessory is not installed.

<table>
<thead>
<tr>
<th></th>
<th>Dip Switch (#4)</th>
<th>Target Leaving Water Temperature</th>
<th>Target Room Air Temperature</th>
<th>Target Sanitary Water Temperature</th>
</tr>
</thead>
<tbody>
<tr>

<td>70°C</td>
</tr>
<tr>
<td>Low temp.</td>
<td>ON</td>
<td>30°C</td>
<td>19°C</td>
<td>50°C</td>
</tr>
</tbody>
</table>
Following features are permitted in emergency operation.:
- Operation On/Off
- VIEW TEMP button*
- Temperature adjust button*
- Sanitary water heating Enable / Disable

* : Temperature measured by failed sensor is displayed as ‘- -’.

* : Adjusted temperature is only used to control electric heater on / off condition. The product does not turn on / off according to the setting temperature at the control panel. It turns on / off according to the thermostat signal.

Following features are NOT permitted in emergency operation.:
- Operating mode (cooling/ heating/ weather-dependent) selection
- Time scheduling
- SET TEMP button

Duplicated trouble: Option trouble with slight or heavy trouble
- If option trouble is occurred with slight (or heavy) trouble at the same time, the system puts higher priority to slight (or heavy) trouble and operates as if slight (or heavy) trouble is occurred.
- Therefore, sometimes sanitary water heating can be impossible in emergency operation mode. When sanitary water is not warming up while emergency operation, please check if sanitary water sensor and related wiring are all Ok.

Emergency operation is not automatically restarted after main electricity power is reset.
- In normal condition, the product operating information is restored and automatically restarted after main electricity power is reset.
- But in emergency operation, automatic re-start is prohibited to protect the product.
- Therefore, user must restart the product after power reset when emergency operation has been running.
Maintenance and Service

Maintenance Activities

In order to ensure optimal availability of the unit, a number of checks and inspections on the unit and the field wiring have to be carried out at regular intervals, preferably yearly. This maintenance should be carried out by your local agreed technician.

When the unit is not going....

⚠️ CAUTION
- If the product is not used for long time, we strongly recommend NOT TO SWITCH OFF THE POWER SUPPLY to the product.
- If power is not supplied, some special product-protecting actions (such as water pump anti-locking) will not performed.

Call the service immediately in the following situations

1. Anything abnormal such as burning smell, loud noise etc. happen. Stop the unit and turn the breaker off. Never try to repair by yourself or restart the system in such cases.
2. Main power cord is too hot or damaged.
3. Error code is generated by self diagnosis.
4. Water leaks from unit.
5. Any switch, breaker (safety, earth) or fuse fails to work properly.

User must carry routine checkup & cleaning to avoid unit’s poor performance.
In case of special situation, the job must be carried out by the only service person.

⚠️ CAUTION
- In the case of water with added brine, the drain valve of shut-off valve must be connected to a recovery container.
- Do not touch the water stirred with the brine.
- When the brine in the pipe is leaked, do not operate the unit and contact dealer, seller or an authorized service center.
## Troubleshooting Tips! Save Time and Money!

Check the following points before requesting repairs or service. If the malfunction persists, please contact your dealer.

<table>
<thead>
<tr>
<th>Case</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>AWHP does not operate.</td>
<td>• Have you made a mistake in timer operation?</td>
</tr>
<tr>
<td></td>
<td>• Has the fuse blown or has the circuit breaker been tripped?</td>
</tr>
<tr>
<td></td>
<td>• If ‘CH 14’ is displayed in the display panel, check whether the water pipe is frost or remove the air in the PHEX by opening the air vent.</td>
</tr>
<tr>
<td>The room has a peculiar odor.</td>
<td>• Check that this is not a damp smell exuded by the walls, carpet, furniture or cloth items in the room.</td>
</tr>
<tr>
<td>AWHP does not operate for about 3 minutes when restart.</td>
<td>• This is the protector of the mechanism.</td>
</tr>
<tr>
<td></td>
<td>• Wait about three minutes and operation will begin.</td>
</tr>
<tr>
<td>Does not cool or heat effectively.</td>
<td>• The room may have been very hot when the AWHP was first turned on. Allow time for it to cool down.</td>
</tr>
<tr>
<td></td>
<td>• Has the setting temperature been set incorrectly?</td>
</tr>
<tr>
<td>The unit operation is noisy.</td>
<td>• Refrigerant flow sound</td>
</tr>
<tr>
<td></td>
<td>- While the system is being started or stopping, sound from the refrigerant flow may be heard.</td>
</tr>
<tr>
<td></td>
<td>• Water noise</td>
</tr>
<tr>
<td></td>
<td>- During starting or stopping of the unit, noise can appear in water piping.</td>
</tr>
<tr>
<td></td>
<td>• During defrost</td>
</tr>
<tr>
<td></td>
<td>- Noise can appear in unit due to defrosting of water.</td>
</tr>
<tr>
<td></td>
<td>• Sound for the unit heat exchanger</td>
</tr>
<tr>
<td></td>
<td>- During the cooling operation, a sound may be heard from the indoor unit heat exchanger due to water freezing or melting.</td>
</tr>
<tr>
<td>Steam is raised in unit.</td>
<td>• Steam from heat exchanger</td>
</tr>
<tr>
<td></td>
<td>- During defrosting operation, ice on the heat exchanger is melted, resulting in making steam.</td>
</tr>
<tr>
<td>Control panel display is faint, or no display at all.</td>
<td>• Has the circuit breaker been tripped?</td>
</tr>
